Scientist: B. A. Daniel

Financial Director/ Manager: Latha G. Ravikumar

Researcher: R. Marimuthu

ZOOS' PRINT magazine is informal and newsy as opposed to a scientific publication. ZOOS' PRINT magazine some-times includes semi-scientific and technical articles which are reviewed only for factual errors, not peer-reviewed. Guidelines for submission of articles for ZP magazine are in the next column. ZOOS' PRINT printed version does not carry photos. The web version carries photos and can be accessed at www.zoosprint.org. ZOOS' PRINT magazine is available on subscription for Rs.300/- per year (add Rs.50/- for outstation cheques). The fee for membership in Zoo Outreach Organisation (also Rs. 300/-) includes a one-year subscription to ZOOS' PRINT and a membership card.

ZOOS' PRINT JOURNAL is no longer published in this name; it is now titled Journal of Threatened Taxa (online) and has international as opposed to regional scope. It can be viewed at www.threatenedtaxa.org.

ZOOS' PRINT Publication Guidelines

We welcome articles from the conservation community of all SAARC countries, including Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka and other tropical countries if relevant to SAARC countries' problems and potential.

Type — Articles of semi-scientific or technical nature. News, notes, announcements of interest to conservation community and personal opinion pieces.

Feature articles — articles of a conjectural nature — opinions, theoretical, subjective.

Case reports: case studies or notes, short factual reports and descriptions.

News and announcements — short items of news or announcements of interest to zoo and wildlife community

Cartoons, puzzles, crossword and stories

Subject matter : captive breeding, (wild) animal husbandry and management, wildlife management, field notes, conservation biology, population dynamics, population genetics, conservation education and interpretation, wild animal welfare, conservation of flora, natural history and history of zoos. Articles on rare breeds of domestic animals are also considered.

Source : zoos, breeding facilities, holding facilities, rescue centres, research institutes, wildlife departments, wildlife protected areas, bioparks, conservation centres, botanic gardens, museums, universities, etc. Individuals interested in conservation with information and opinions to share can submit articles ZOOS' PRINT magazine.

Manuscript requirements:

Articles should be typed into a Word format and emailed to zooreach@zooreach.org. Avoid indents, all caps or any other fancy typesetting. You may send photos, illustrations, tables, but photos will not be used in the printed version, only in the web version.

Articles which should contain citations should follow this guideline : a bibliography organized alphabetically and containing all details referred in the following style : surname, initial(s), year, title of the article, name of journal, volume, number, pages.

Editorial details :

Articles will be edited without consultation unless previously requested by the authors in writing. Authors should inform editors if the article has been published or submitted elsewhere for publication.

Available from : IUCN Sri Lanka Country Office, 53 Horton Place, Colombo 07, Sri Lanka. Tel:+9411 2682418, Fx: +9411 268 2470

The Wilpattu National Park has the unique feature of having a large number of villus or lakes, which are natural sandrimmed depressions that store rain water. Although situated in the dry zone of Sri Lanka, the villus provide muchneeded seepage water to maintain the splendour of itsecosystems. It is the oldest and the largest National Park in Sri Lanka, steeped in history and covered with legend. The Mahavansa records that in 543 BC Prince Vijaya landed at Kudrimalai Point (Horse Point) and married Kuweni, who is said to have lived in a place now identified as Kali Villu. Prince Vijaya gave the name Thambapanni to Sri Lanka. History also shows that Prince Saliya, son of King Dutugemunu, lived with Asokamala in Maradanmaduwa in Wilpattu over 2000 years ago. In 1905 the area was designated a sanctuary and in 1938 it was upgraded to the National Park status.

3rd Asian Lepidoptera Conservation Symposium

25 - 29 October 2010
Coimbatore, India

The Third Asian Lepidoptera Conservation Symposium and Training programme is jointly organized by IUCN SSC South Asian Invertebrate Specialist Group (SAsISG), Department of Zoology, Bharathiar University (BU), Zoo Outreach Organisation (ZOO) and Wildlife Information Liaison Development (WILD) in collaboration with invertebrate conservation groups, research organizations, universities and institutes as well as non-government organizations that work on conservation biology across Asia. The 3rd ALCS will be held from 25 to 29 October 2010 at Coimbatore, Tamil Nadu, southern India.

The **theme** of the 3rd ALCS is

"Local community conservation meeting Asian Lepidoptera conservation needs"

The key areas of 3rd ALCS are to:

- investigate the use of iconic / endemic flagship Lepidoptera species to promote habitat conservation through community involvement;
- assess priority areas / communities for Lepidoptera conservation initiatives at the local level that has global conservation impact;
- provide tools for species status assessment;
- train participants in moth and butterfly identification skills; and
- explore aspects of moth and butterfly conservation ecology, management and needs

The symposium is open to anyone interested in moth and butterfly conservation, policy, social, ecological and livelihood related aspects. Students, researchers and academics, policy makers, government officials, non-government and community based organizations and volunteers will find the symposium an ideal opportunity to enhance their understanding of the subject, meet with their counterparts and experts from Asia and rest of the world and share their expertise and experiences with others.
