Commitments

. . .from Participants and Resource Persons of *in situ* Training Workshop

Sornappan -- will conduct a census of LTM's in his area and report data to department and to Z.O.O.

James -- will undertake an intensive survey of entire Periyar including outer boundaries before February 1997

Jeyaperanbikumar -- will conduct a census of LTM in his area and also teach some of the principles he has learned in the workshop to his subordinates.

Chinnadurai -- will arrange for conducting a small workshop for his forest guards in six months time and also conduct a census of LTM in his area.

Manjunatha -- will insure that no habitat destruction will take place when he is posted permanently. He will also teach subordinates how to use the tools he learned in the workshop.

Niraj -- will think about how to improve the model. He will also include the tools for assessing populations in his wildlife management plan.

Ramachandran -- will analyse his several years of data on LTM in Silent Valley, publish the Report and apply for funds for further LTM research.

Bob -- will help people with their questions about modeling.

Jon -- will give a talk at his daughter's school in USA about LTM

Sanjay -- will be available to further modelling both in his office and to visit the field and talk with forest guards and will make slides for teaching about LTM.

Sally -- will make the resources of ZOO available to DFO's who want to conduct capsule workshops or lectures for their subordinates, and will develop more educational materials on LTM for zoos and for range offices.

ZOO -- will initiate a meeting in Valparai with foresters, researchers, environmental NGO's and estate owners to enlighten the estate owners about the plight of LTM and discuss measures they could take to protect both the animal and their property. ZOO will also make some educational material which can be used to educate local people and their children about the importance of LTM.

. . .from Participants and Resource Persons of *ex situ* Workshop

Manimozhi -- will correct record entries by biologists and send correct figures to International Studbook keeper

Raajalinga Raja -- will prepare format for Zookeepers to keep observational records ; will explain to zookeepers the importance of collecting behavioural information of LTM *ex situ*.

Kalaichelvan -- will collect breeding data on LTM; regularise LTM records at his zoo; teach zookeepers about LTM

Rawat -- will collect records of LTM at NZP

Gopalakrishnan -- will update all records at Trivandrum Zoo and make them correct by 30 November 1997.

Saba -- will assist Zoo Outreach Organisation in preparing educational material for LTM for zoos

Acharjyo -- will compile health data for LTMs in all Indian zoos

Jha -- will start captive breeding programme at Central Zoo, Nepal and enhance management proceedures.

Purohit -- will motivate keepers for better care of LTMs; will collect information from keepers or directly; will provide more captive data to CZA; will devote one hour a week to LTM

Brij -- will develop signage on LTM for ZOO

Rajegowda -- will keep a daily observation book to record the behavioural aspects and other health monitoring aspects.
-- will teach zoo keepers about the feeding, social behaviour, environmental enrichment to keep track of breeding symptoms and avoid vandalism
-- will introduced boiled egg to LTM
-- will take up breeding programme

Bob -- will answer questions about computer programmes

Ajith -- will monitor LTMs in the wild and see that no LTM has to come into captivity by necessity

Iqubal -- will help with enrichment ideas and devices; will help if reintroduction programme is implemented

Laurie -- will add all participants to Old World TAG Newsletter; will answer questions about husbandry

Desai -- will find old history sheets of LTM in Delhi Zoo and regularise NZP record

Sharma (CZA) -- will support any programme for improving housing or health care of LTM

Sally -- will attempt to find an industrial sponsor in India for LTM "advocate", a researcher and naturalist to do nothing else except promote conservation for LTM in India ; and develop and distribute educational materials to zoos to encourage keepers and volunteers to educate the public about conservation of LTM.

Sanjay -- will become more expert in the relevant computer programmes relative to zoos (e.g. SPARKS, DEMOG, etc. and provide training to persons who want to learn these programmes.
